

Dear Hampton Residents,

The Hamptons is happy to announce that it will be offering Covid-19 testing on Tuesday, June 23rd. This procedure will determine if a resident currently tests positive or negative for the virus. Please note that this is not an anti-body test which would determine if a resident had previously been affected. If a resident does test positive for the Corona Virus, they will be called within 24 to 48 hours with the result and others will be notified by mail within 24 to 72 hours. All interested residents will be tested by a certified lab technician from Physicians Stat Lab by means of a nose swab. The tests will be performed as a 'drive-thru' under the Clubhouse portico from 9am until 2pm. Residents will remain in their cars or golf carts for the test, and naturally, the first residents on line will be the first served. If you do decide to participate, please be sure to bring your license and insurance card as the lab conducting the testing does require this information. No matter what insurance is provided to the lab, this test is free of charge with no fees for co-pays, however, if you do not have insurance, you will be asked to pay the lab \$99.00 at the time of service.

The Hamptons is also happy to see our residents once again enjoying themselves since Sun Communities has allowed the opening of many outdoor and indoor activities. Please know that Phase II guidelines, which limits access to 'residents only' as well as a specific number of people, are set in place to ensure the safety of all our residents. We look forward to the opening of all facilities and activities in the near future so our home will recommence as the Hamptons Community we have all come to know and love.

Sincerely,
Lee Meehan
Office Coordinator
